

FAT HENRY

**Henry was 41.2kg
his huge appetite meant that he
was never satisfied and always
wanted more food!**

**Henry ate his Mum's food if he
could pinch it,
he ate the other dogs' food,
he ate the cat's food.**

**Henry should really weigh about
32kg.**

Henry's Mum was very worried about him.

So Henry went on a diet.

**He also had a liquid called Slentrol, added to one meal each
day. It makes him feel less hungry and stops the body using
the fat in the food.**

**Soon Henry was down to his target weight and
LOOKING GOOD!!**

SLIM HENRY

**Henry is now down to his target
weight. He lost 9.5kg.**

**He is on a new diet that
makes him feel full.**

**Though he still
would help himself
to the cats food
cos he's learnt how to
open the cupboard door!!**
